CATALOGUE

OF

FRUIT & FOREST TREES.

Flowering Shrubs & Plants,

FOR SALE BY

JAMES BLOODGOOD & CO.

AT

Their Nursery,

FLUSHING, LONG ISLAND,

NEAR NEW-YORK.

NEW-YORK:

PRINTED BY J. GRAY & CO. 347 PEARL-STREET,
FRANKLIN SQUARE.

1845

The following Trees are propagated from Trees of the most approved European and American sorts, which have been selected with great care.

The *Fruit Trees* are grafted, or innoculated, and if required for exportation, will be carefully packed in matts or boxes, so as to be sent to Europe, the West Indies, or any part of America, with safety.

Orders for American Forest Trees and Shrubbery, not enumerated in this Catalogue, will be particularly attended to, agreeable to order.

Orders left with, or sent to, THOMAS BLOODGOOD, No. 206 Front-street, New-York, or forwarded to JAMES BLOODGOOD & Co. Flushing, will be carefully attended to, and the Trees delivered at New-York free of freight.

N. B. The time of Fruits' ripening will be found to vary, as the season may prove early or late. *Trees of extra large size, an additional price in proportion.*

these checked thus ~~if~~ are wanted

	Rose Coloured Pioney \$1
	White Pionea \$1
	Veronica of Virginia 50 cents

* * Orange and Lemon trees, with other Green House Plants, furnished agreeable to order.

DIRECTIONS FOR PLANTING TREES.—Let the hole be dug sufficiently large to admit the roots in their natural position. The depth should be from 2 to 3 inches deeper than it stood before transplanting, taking care to cut off all the wounded parts of roots; then filled up with rich mould made fine; if not, some well rotted manure, to be mixed with mould. After covering the roots shake the tree, that the earth may be admitted among all the small roots; then fill it up, treading round the tree. In dry seasons watering will be of service. The head of the tree should be cut off in proportion to the size.
